PROFESSIONAL SUMMARY

Security-focused Cybersecurity Engineer with 5.5+ years of experience across Microsoft 365, Azure, and Google Workspace security operations. Currently a Technical Support Engineer on Microsoft's Defender for Office 365 (MDO) team, specializing in email threat protection, identity-driven threat investigation, and Defender XDR-based incident response. Proven track record resolving 1,000+ security incidents, performing 300+ threat investigations, and driving detection-accuracy improvements across the Microsoft Defender suite. Skilled in KQL-based threat hunting, Zero Trust architecture, and PowerShell automation, with deep cross-functional experience supporting enterprise tenants and global Microsoft engineering teams.

CORE SKILLS

Security Operations & Threat Protection: Microsoft Defender XDR, Defender for Office 365 (MDO), Defender for Endpoint (MDE), Defender for Identity (MDI), Defender for Cloud Apps (MDCA), Microsoft Sentinel, Safe Links, Safe Attachments, ZAP, Threat Explorer

Identity & Access Management: Microsoft Entra ID (Azure AD), Conditional Access, MFA, PIM, Identity Protection, Zero Trust Architecture

Email Security & Authentication: SPF, DKIM, DMARC, Anti-Spam/Anti-Phishing Policies, Transport Rules, Exchange Online Protection (EOP), Proofpoint, Perception Point

Threat Hunting & Incident Response: KQL Query Development, Advanced Hunting, RCA, Alert Triage, Phishing/BEC Investigation, False-Positive Tuning

Security & Compliance: Microsoft Purview, DLP, eDiscovery, Retention Policies, Sensitivity Labels

Cloud & Device Management: Microsoft 365, Microsoft Azure, Google Workspace, Microsoft Intune, MDM/MAM

Automation & Scripting: PowerShell (automation, bulk operations, security reporting)

Collaboration: L2/L3 Support, Cross-Functional Collaboration, Stakeholder Communication

PROFESSIONAL EXPERIENCE

Technical Support Engineer – Microsoft Defender for Office 365 (MDO) | Microsoft

Noida, India | November 2025 – Present

- Provide L3-level support for Microsoft Defender for Office 365, focusing on identity-driven threat protection and SCIM-related security scenarios.
- Investigate complex security incidents including phishing, malware, Safe Links/Safe Attachments detonations, and ZAP behaviors using Defender XDR's unified incident view.
- Perform deep-dive analysis of detection false positives/negatives and collaborate with product engineering to improve detection logic and supportability.
- Analyze email headers, message traces, and Threat Explorer data to identify root cause and remediation steps.
- Support identity-integrated security scenarios involving Microsoft Entra ID, Conditional Access, and risky sign-ins impacting MDO protections.
- Deliver detailed Root Cause Analysis (RCA) and contribute to internal knowledge base and product feedback loops.

Senior System and Infrastructure Engineer | Netoyed

Noida, Uttar Pradesh, India | January 2024 – September 2025

- Acted as escalation point for security incidents across Microsoft 365 tenants, including phishing, malware, and account compromise scenarios.
- Investigated and remediated threats using Microsoft Defender for Office 365, Defender for Endpoint, and Defender for Cloud Apps.
- Implemented and optimized Safe Links, Safe Attachments, and anti-phishing policies, improving threat detection accuracy.
- Enforced Zero Trust architecture using Conditional Access and MFA policies; monitored and remediated risky sign-ins and compromised accounts.
- Developed PowerShell scripts for security reporting, automation, and incident response, reducing manual effort by 30%+.
- Supported cross-tenant security configurations and delivered RCA to improve overall security posture.

Associate Team Lead – Office 365 | Allyis (Tech Mahindra)

Bengaluru, Karnataka, India | July 2023 – December 2023

- Provided L2/L3 support for Microsoft 365 security and compliance workloads.
- Investigated security alerts and incidents, ensuring timely resolution and root cause analysis.
- Improved detection efficiency by tuning security policies and automating repetitive tasks.
- Collaborated with internal and Microsoft teams to enhance product supportability and customer experience.

Escalation Engineer – Office 365 | Allyis

Hyderabad, Telangana, India | March 2023 – July 2023

- Resolved high-complexity Office 365 escalations, with focus on Exchange Online and tenant-level security configuration issues.
- Supported Microsoft clients in troubleshooting complex Defender and identity-related issues.

Operations Lead (Sr. Technical Advisor – O365) | Concentrix

Gurugram, Haryana, India | February 2022 – March 2023

- Configured and managed email security policies including anti-spam, anti-phishing, and ATP.
- Performed threat investigations including phishing analysis and malicious email tracking.
- Implemented SPF, DKIM, and DMARC to strengthen email authentication and security posture.
- Delivered RCA for recurring security incidents and recommended preventive improvements.

Quality Assurance Analyst (Fraud Prevention) | Teleperformance – Microsoft Client

Jaipur, Rajasthan, India | July 2021 – February 2022

- Monitored suspicious account activities and investigated unauthorized access attempts.
- Identified fraud patterns and worked with internal teams to mitigate risk exposure.

Technical Support Representative – Microsoft 365 | Teleperformance

Jaipur, Rajasthan, India | March 2020 – June 2021

- Provided technical support for Microsoft 365 services including security and access issues.
- Assisted customers with secure configuration and troubleshooting of cloud services, building the foundation for a security-focused career.

KEY ACHIEVEMENTS

- Resolved 1,000+ security and support incidents across Microsoft 365 and Defender environments.
- Performed 300+ threat investigations spanning phishing, BEC, malware, and identity compromise scenarios.
- Handled 150+ customer escalations across enterprise Microsoft 365 tenants.
- Improved threat detection accuracy by tuning Defender policies, significantly reducing false positives.
- Automated security reporting and administrative tasks via PowerShell, cutting manual effort by 30%+.

- Strengthened tenant email security posture through SPF/DKIM/DMARC hardening and anti-phishing policy optimization.

CERTIFICATIONS

Earned	Certification Roadmap (In Progress)
MS-102: Microsoft 365 Administrator	SC-200: Security Operations Analyst
CompTIA A+ (220-1001 / 220-1002)	SC-300: Identity & Access Administrator
Lean Six Sigma Yellow Belt	SC-100: Cybersecurity Architect Expert
M365 Exchange Online Specialist Learning Path	AZ-500: Azure Security Engineer

EDUCATION

Bachelor of Technology (B.Tech), Mechanical Engineering

Shankara Institute of Technology, RTU – Jaipur | August 2017 – September 2021
